Some Interesting Examples of Scott #TD57A MAIL-O-METER Test Coils

by Terry R. Scott

Recently a collection came to light that had some very nice examples of the Scott TD#57A MAIL-O-METER deep purple test coils.

In my years of collecting I can not recall seeing this many of the Scott #TD57A test coils at one time. In fact, I can't recall seeing any examples for sale or auction in the many years that I have been collecting test stamps. That is not to say they have not appeared, it just means that I was not aware of them coming to market.

Scott #TD57A is listed in the Scott catalog with the following description.

**Perf. 12 (9 small holes)**

TD57A   TE30     deep purple —
Pair —

No value is given for this stamp.

Illustrated below are a few examples of the Scott #TD57A test stamps.

Shown above is a close-up of the far right stamp from the strip shown on the following page.

*please turn to page 2 ➤*
The strip of three shown above has what appears to be a guide line at the far right of the strip, or is it a layout line since there is evidence on another vertical line at the left of the far right stamp and certainly a horizontal line across the top of that stamp. Under (behind) the far right stamp is another Scott #TD57A test stamp that once made this a paste-up strip. It is too bad that the stamps that were once to the right have been removed.

The strip of three shown above has a sheet margin at the far right of the strip and shows evidence that there was probably another Scott #TD57A test stamp stamp pasted on top of this sheet margin that once made this a paste-up strip.

The strip of three shown above has a straight edge at the far left of the strip and shows evidence on the back of the far left stamp that it was once pasted to something, quite possibly on the sheet margin at the right of the strip shown above it. Placing those two strips together, the spacings between the perforations are correct. That would make a beautiful Paste-up strip of 6.

The spacings between the vertical perforations are not quite the same, indicating the perforations may have been applied one column at a time.

*please turn to page 3 ➤*
The strip of four shown above has "double perforations" in the center of the strip.

Recent Auctions of Interest to Dummy Stamp Collectors

by Terry R. Scott

On January 6, 2017 Paradise Valley Stamp Company held the following sales that contained the following test stamps. There is no Buyer’s Premium for this sale. These lots did not sell at any of these sales.

Requests for Articles for The United States Specialist

Leonard Piszkiewicz, Editor of The United States Specialist, is always looking for articles of interest for inclusion in our society’s monthly publication. The type of articles Len needs most are the shorter ones, one or two-page articles. If you are considering writing an article for The United States Specialist, please contact him for instructions. If the article is regarding dummy stamps, I would appreciate knowing about it also. Many members of the DSSG have written articles on dummy stamps and other stamps for this publication. It is rewarding and other USSS members benefit greatly from the information that is published in The United States Specialist.

Leonard can be reached by e-mail at: lenp@pacbell.net

Proposed Future DSSG Project

Updating Research Paper Number 3 - Dummy Stamp Booklets

Work is progressing, very much still at a snail’s pace, on updating Research Paper Number 3 - Dummy Stamp Booklets. The last update by Earl McAfee, Dummy Booklets Study Group Chairman, was in 1998. Since then there have been many new discoveries. Many of them have been written up in articles in The United States Specialist. Now the time has come to document and illustrate them in a new updated version of Research Paper Number 3. I am in charge of this update project and knowing that it will take quite a bit of time to complete, have no estimated completion date in mind. I will be asking all of you to join me in this project as I am not able to do it all, nor would you want me to do it all. It is a DSSG project and all members should have a chance to provide their input. Several illustrations are needed and a listing of these will be sent to you when I compile it. Scans at 300 dpi are necessary for clarity. It is anticipated that this publication will be in color. It has not yet been determined if it will be available on CD.

The Other Projects

There are several other projects currently being worked on by various members of the DSSG. They are as follows:

• Compiling a complete and comprehensive list of dummy test stamp roll sizes, box and roll labels. There are many different styles of labels sometimes found on the same test stamps. This is especially true of Bureau of Engraving and Printing products

• Compiling a complete and comprehensive record of auction appearances and prices realized for test stamps

• Compiling a complete and comprehensive listing of references for test stamps

• Compiling a complete and comprehensive list of plate numbers printed on test stamps and the frequency in which they appear and the frequency of joint lines on test coils when they appear.

This issue and all past issues of the Dummy Stamps Study Group Newsletter - Dummy News and Views may be found at:
